

## HS5.201 Growth and Development

### Group Project

1. Choose any country other than India. Analyse the growth experience of this country in the 21<sup>st</sup> century and identify the different sources of growth for this country. Use your understanding of the growth models studied in class, but go beyond them if required.
2. Choose any country other than India. Compare the growth experience of this country in the last 50 years with its development indicators (social, political, environmental and economic other than growth). Based on your analysis, comment if growth has translated to development for this country.
3. Choose any OECD country (check list online). Study the growth experience of this country in the period since the 2<sup>nd</sup> World War to understand the environmental impact of this growth. Based on your analysis, comment if positive growth in the next few decades is sustainable for this country.

### Instructions

- Each group will choose and answer any of the above questions during a 20-minute presentation scheduled for the end of April 2023 (dates to be announced later). The presentation will have to be made jointly (or in parts) by all the group members, and each student will be marked on the quality of their presentation and its fit with the entire argument developed by the group. The presentation will be worth 25 per cent of the total course grade.
- Each student should also submit a structured write-up (between 1200- 1500 words) which explains in some detail ( including the analysis of data) the presentation made by the student. The document should be written professionally with a precise sequence of issues being discussed and include detailed references at the end (will not count in the word limit). The write-up will be worth 10% of the course grade and due before the group presentations start.
